

The Model 801 Electromagnetic Flow Meter measures the speed of water in Open Channel environments with exceptional accuracy. The smaller sampling volume of the flat sensor makes it suitable for shallow flows, or measurements in confined spaces.

DATA SHEET

Product Details

Specifications

Model 801 - Flat Type

Range	-5 m/s - +5 m/s
Accuracy	±0.5% of reading plus 5 mm/s
Zero Drift	<5 mm/s
Sensing Volume	Cylinder of approx. Ø20 mm x 10 mm high
Minimum Depth	5 cm

Data Acquisition

The Model 801 Flow Meter is supplied with a dedicated Control Display Unit that both drives the sensor and provides data display of the measured water velocity.

Data is updated at 1 Hz, and may be averaged over any number of seconds from 1 to 600. The display will show real time speed data at a resolution of 1 mm/s, as well as the result of the data average, and a Standard Deviation figure to give added data confidence. A solid state memory records all results (up to 999 averaged readings), and the data may be downloaded to PC using the RS232 interface lead supplied.

Calibration

The Model 801 is calibrated at Valeport's own premises up to speeds of 1 m/s. Higher speed measurements are based on linear extrapolation. Specific high speed calibrations can be arranged at a third party facility on request

Control Display Unit

Size	244 mm x 163 mm x 94 mm, 2 kg			
Environmental	Sealed to IP67			
Power	8x alkaline C cells, up to 37 hrs operation			
Operating Temp	-5°C - +50°C (display unit)			

Application

The Model 801 is available for use as hand held "Wading Sets" only, with the operator standing in the channel, holding the instrument in position. The system is supplied with 1.5 m wading rod (3 x 0.5 m sections), graduated in cm, and a 3 m cable from instrument to display unit.

Alternatively, a "top-setting" wading rod system is available, which allows the vertical position of the instrument to be set without removing the wading rods from the water.

Software

System is supplied with CDUExpress Windows based PC software, for data extraction from display unit. CDU Express is licence free.

Shipping

Standard	62 cm x 42 cm x 34 cm, 9 kg (wading set)
Juliana	02 cm x 42 cm x 34 cm, 3 kg (waamg scr)

Ordering

0801002-XX Single Axis - Flat Sensor with Control Display Unit, interface cable and operating manual in an ABS transit case

The above systems are supplied with:

- 2, 5 or 12 m cable (different lengths on request)
- · Wading rod set
- 3×0.5 m graduated rods, base and direction knob, in a canvas carrying bag

Note	\A/horo	VV -	Cablo	lonath	of 2	5 or 12m
note	vvnere	AA -	Cable	ienair	1 OI Z.	5 01 12111

Options

0801003 Wading Rod Set supplied with:

• 3 x 0.5 m graduated rods, base and direction knob, in a canvas carrying bag

0001050 Top Setting Wading Rod Set for use with standard wading rod

set consisting of: • 3×0.5 m graduated rods and necessary mounting brackets, in a canvas carrying bag

0801011 Large transit case for instrument and wading rods

0300EA3 External DC power option (includes DC power input lead)
